

Using Internet Explorer 10.0 with eGrants

Grantees using Internet Explorer (IE) 10 to access eGrants may find that system functionality is limited or unavailable. TEA staff is currently upgrading the eGrants system to make it accessible from IE 10.

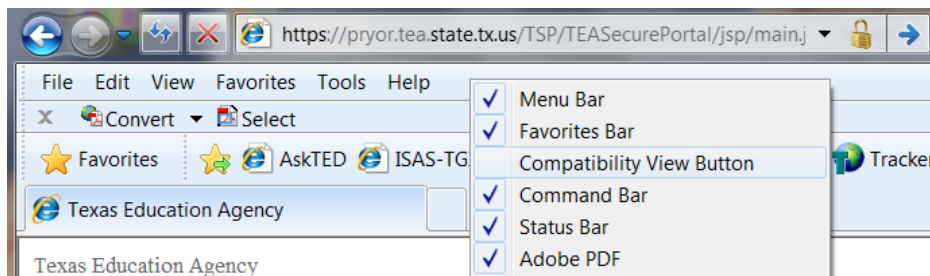

Until that upgrade is complete, grantees can access the “Compatibility View” function to use IE 10 with eGrants.

To access the Compatibility View, **log into TEASE or TEAL** and follow these steps:

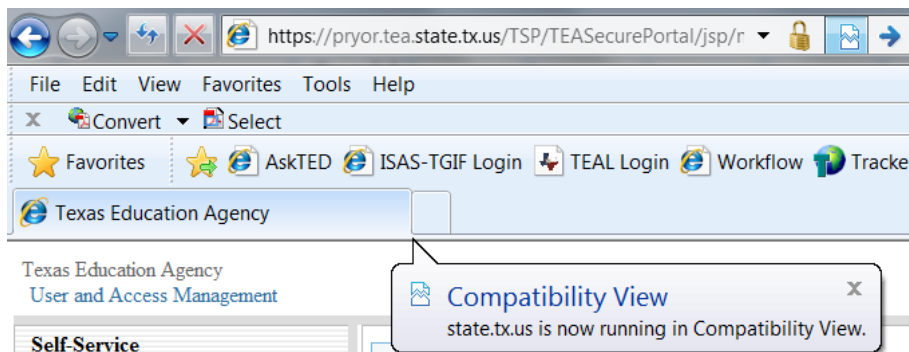

1. Locate the page icon at the right of the TEASE or TEAL URL.

If the page icon is not visible, right click on the menu bar. From the context menu that opens, select Compatibility View Button. The page icon will appear to the right of the lock icon, as shown above.

2. Select the page icon. The icon background will change to a darker blue, indicating activation. A popup will appear confirming that the secure TEAL or TEASE page is now running in Compatibility View.

You should now be able to access eGrants, and other TEA systems, using IE 10.
